# TURBIDITY SENSOR TU5000 ON CONTROLLER TU3020

#### **CABLE CONNECTION RP2345**

0	Shield	23
1	HI Turbidity	22
2	LO Turbidity	25
3	Check signal	24
4	Control LED	19
5	0	21
6	+ 12V	18
7	- 12V	17

### **POWER SUPPLY CONTROLLER**

220 Volt : 1 and 3

Ground: 4

Please note: The connector from the cable to the sensor needs to be mounted correctly.

This is done by connecting them firmly and securing the connection by tightening the ring. This is very important because if this is not done properly

there is a chance of moist/water reaching the connector, possibly causing

damage.

From the factory it is not necessary to either calibrate the controller or sensor.

# **SETTINGS:**
