NIE-CO-ROL MAXI & MEGA

TO MEASURE  TO KNOW

General

The Nie-co-rol is specially for straightening flower like orchids, roses etc. Labour saving devices and long life duration (original product!).

Nie-co-rol "MAXI" : wire-length \pm 130 cm

Nie-co-rol "MEGA" : wire-length \pm 165 cm
(higher traction)

The Nie-co-rol can be supplied with a large **(A)** or small **(B)** hook.

The Nie-co-rol "MEGA" will always be supplied with an orange coloured hook, so we can see a distinction between the Nie-co-rol "MEGA" and "MAXI" (white colour).

The various hooks can also be supplied separate from the Nie-co-rol in the colours orange or white. Other colours on request.

Nie-co-rol with large hook **(A)**

Nie-co-rol with small hook **(B)**

Technical specifications

- * The spring of the Nie-co-rol "MEGA" is stronger, so that the traction is much higher as the "MAXI". (Your choice depends on the weight of your cultivar).
- * All material is UV stabilised and the spring inside is made of stainless steel, which extends the working life of the material and allows it to keep its properties longer.
- * The suspension hook on the cover can have all wire thickness up to 3½ mm.
- * The Nie-co-rol practically never develops defects. If a Nie-co-rol happens to become faulty as a result of extreme conditions, the wire can be wind up on the outside of the roll.
