SOIL MOISTURE METER

TO MEASURE  TO KNOW

This tester helps you to check soil moisture value in your garden, yard and cropland.

Soil moisture is a measure of soil health, water contented in soil is essential for plants, because the water content in soil is a solvent, meaning that it breaks down the nutrients and minerals that plants need from the dirt, allowing them to absorb these helpful particles into their systems. All plants need to be in a specific soil moisture range.

Applications:

The tester will quickly tell that soil is DRY (plants need watering) or WET (needs to dry out).

You will never over-water or under-water your plants.

Save water and save money.

So, this soil moisture tester is an ideal testing device for orchards, field produce, nurser planters, lawn maintenance, planters, etc.

Features:

- Innovative meter body with humanized reading angle for easy and comfortable reading
- 4-color reading scale
- The sensor cone never falls off due to the up-graded structure
- No batteries or electricity needed
- Indoor / outdoor use, convenient & easy operation

Specifications:

- Testing range: soil moisture: 1 – 10
- Length of sensor probe: 160 mm
- Product size: W 52.5 x D 33.8 x H 240.6 mm
- Weight: approx. 42 g (without packing)
